

Mukesh M

Software Engineer III | Full Stack Engineer | Backend Developer | Finance Systems Expert

 mukeshta1422@gmail.com  +91 7904636531  <https://www.linkedin.com/in/mukesh-m-sde/> • Chennai, India

PROFESSIONAL SUMMARY

Software Engineer III with 2+ years of hands-on experience architecting and deploying enterprise-grade ERP and financial systems. Specialized in full-stack development with React.js and Node.js, delivering high-performance solutions that reduced processing time by 30%+ and automated critical finance workflows. Deep expertise in financial domain including GL reconciliation, profit & loss analysis, cash flow reporting and regulatory compliance. Proven track record of building scalable REST APIs, optimizing complex SQL queries and collaborating with cross-functional teams to deliver production-ready features that directly impact business operations.

CORE COMPETENCIES

FRONTEND

React.js • Next.js • Angular • HTML5 • CSS3 • Tailwind CSS • Responsive Design

DATABASE & QUERY

MySQL • MongoDB • SQL Optimization • Indexing • Query Performance Tuning

FINANCE DOMAIN

GL Reconciliation • Financial Reporting • Trial Balance • P&L Analysis • Receivables/Payables

BACKEND & ARCHITECTURE

Node.js • Express.js • REST APIs • Microservices • System Design • Database Design

DEVOPS & CLOUD

Docker • CI/CD • Linux • Git • AWS • Deployment Pipelines • Monitoring

AI/ML & DATA

TensorFlow • PyTorch • Scikit-learn • Data Analysis • Feature Engineering • Model Evaluation

PROFESSIONAL EXPERIENCE

Apr 2024 – Present

Eon Matrix Mindz India Pvt. Ltd.

Software Engineer III

Chennai, India

Phase 3: Software Engineer III – Finance Domain Lead (Mar 2026 – Present) – Advanced to senior role with deep specialization in enterprise finance systems and automation.

- **Finance Analysis & Reporting:** Architected comprehensive financial reporting suite with GL reports, multi-level trial balance, variance analysis, and drill-down capabilities serving 50+ corporate users.
- **Workflow Automation:** Designed intelligent automation reducing manual reconciliation and month-end closing tasks by **40%**, saving 80+ hours monthly operational time.
- **User-Centric Design:** Created intuitive UX for complex financial modules with step-by-step wizards and contextual help, improving adoption rate by 60%.

- ▶ Implemented real-time dashboard syncing enabling live financial visibility for CFO and accounting teams.
- ▶ Architected API framework for GL and receivables modules supporting concurrent processing of 1000+ transactions per second.
- ▶ Mentored 2 junior developers on finance domain concepts, React patterns and backend optimization techniques.

Phase 2: Deployment & DevOps (Jan 2026 – Feb 2026) – Promoted to manage production deployments, CI/CD pipelines and release cycles.

- ▶ Streamlined Docker-based deployment pipeline reducing deployment time by 45% and enabling daily releases.
- ▶ Set up comprehensive monitoring and alerting for production systems ensuring **99.2% uptime**.
- ▶ Managed production releases coordinating with QA, product and infrastructure teams.

Phase 1: Full Stack Development (Apr 2024 – Dec 2025) – Built enterprise ERP modules using React.js and Node.js/Express.js, architecting scalable backends integrated with MySQL and MongoDB.

- ▶ Designed and developed 15+ financial modules including Trial Balance, Profit & Loss, Bank Reconciliation, Customer/Vendor Ledgers, Statement of Accounts, and Receivables Management.
- ▶ Built 25+ production REST APIs handling high-volume financial transactions with JWT authentication and data validation.
- ▶ Optimized SQL queries reducing application response time by **30%+** through strategic indexing, query restructuring and execution plan analysis.
- ▶ Implemented lazy loading and virtualization on financial dashboards supporting 10,000+ records rendering in milliseconds.

Shiash Info Solution Pvt. Ltd.

Sep 2023 – Nov 2023

Machine Learning Intern

Chennai, India

Developed machine learning solutions for fraud detection in digital payments, implementing classification models and real-time inference APIs.

- ▶ Built UPI fraud detection models using Logistic Regression, Decision Trees and Naive Bayes achieving **92% accuracy** on transaction classification.
- ▶ Performed comprehensive feature engineering on 50+ transaction attributes improving model recall by 35%.
- ▶ Developed Flask REST API for real-time ML inference integrated with production payment systems.
- ▶ Documented model behavior, inference pipeline and integration guides for downstream teams.

FEATURED PROJECTS

Enterprise Finance ERP Platform

Full-stack platform supporting comprehensive finance operations including GL, receivables, payables, and reporting with multi-tenant architecture.

React.js • Node.js • Express • MySQL • MongoDB • Docker • AWS

Financial Dashboard Suite

Real-time analytics platform with 15+ interactive dashboards, variance analysis, and drill-down reporting. Handles 100K+ transactions with sub-second query response times.

Workflow Automation Engine

Intelligent automation system for month-end closing, GL reconciliation and financial consolidation reducing manual effort by 40%.

[Node.js](#) • [Express](#) • [Job Queues](#) • [MySQL](#) • [Scheduled Tasks](#)

UPI Fraud Detection System

ML-powered fraud prevention system for digital payments achieving 92% accuracy with real-time inference.

[TensorFlow](#) • [Scikit-learn](#) • [Flask](#) • [Python](#) • [Feature Engineering](#)

EDUCATION

PSG College of Arts & Science

2021 – 2023

[Master of Computer Applications \(MCA\)](#)

Sri Krishna Arts & Science College

2018 – 2021

[B.Sc. Mathematics](#)

CERTIFICATIONS & RECOGNITION

- ✓ IBM Data Science Orientation
- ✓ Foundations: Data, Data, Everywhere - Google Data Analytics
- ✓ Graphic Design & Multimedia - Professional Training
